

AGROCHEMICALS

70% of the African population, works and lives of agriculture. The various food crises that crossed Africa in the recent decades have considerably increased the importance of the agricultural sector. ALM International has benefited from major expertise in this sector for several years.

« 70% of the African population works and makes a living in agriculture. »

ALM International, a recognised expert in the AGROCHEMICAL sector, has been focusing its attention on the distribution of quality products at the best price for more than 30 years.

It is from this perspective that each year ALM International endeavours to develop new products that are more and more eco-friendly, responding to the expectations of the farmers in their constant fight against weeds, crop-destroying insects, diseases and drought.

ALM International's products are developed and approved according to national guidelines and in relation with various national and international research organisations.

ALM International has at its disposal more than 200 approved agricultural chemicals in the whole West-African zone (Mauritania, CILSS, Cameroon, Gabon, Congo, DRC, etc.) which can be distributed and used in this area.

All the active ingredients in our products are made by major global agricultural chemical groups that allow us to easily respond to specific needs.

ALM International has been able to adapt to its market and offers innovative products that are always on the leading edge of research.

OUR AGRICHEMICAL RANGE OF PRODUCTS

The range of products offered by ALM International cover the following crops :

PINEAPPLES, BANANAS, PLANTAINS, COCOA, COFFEE, SUGAR CANE, COTTON, VEGETABLE CROPS, RUBBER, CORN, MILLET, PALM OIL, RICE, SORGHUM AND OTHER CEREALS ...

And are primarily :

- FUNGICIDES
- HERBICIDES
- INSECTICIDES
- MOLLUSCICIDES
- NEMATICIDES
- GROWTH REGULATORS
- SEED TREATMENT
- STORED FOOD TREATMENT

A WIDE RANGE OF PROFESSIONAL PRODUCTS

MORE THAN
30 YEARS
OF EXPERTISE

ORGANIC PRODUCTS

- Nematicide, insecticide, pheromones, mycorrhiza, nitrogen assimilation bacteria

COTTON

- **Herbicides** : glyphosate, fluométuron+prométryne, propaquizafop, diuron.
- **Insecticides** : cypermethrine, cypermethrine + acetamiprid, profenofos, indoxacarb, chloranpropinole, lambda-cyhalothrine, acetamipride, chlorpyrifos ethyl.
- **Seed treatments** : imidacloprid + thiram.

PINEAPPLE - BANANA - PLANTAIN

- **Herbicides** : bromacil, glyphosate, glufosinate-ammonium, propaquizafop, diuron.
- **Fungicides** : mancozeb, chlorothalonil, tebuconazole, epoxiconazole, tridemorph, azoxystrobin, prochloraz, fosetyl-aluminium.
- **Nematicides-insecticides** : oxamyl, terbufos, chlorpyrifos-ethyl, cypermethrin, deltamethrin.
- **Molluscicides** : metaldehyde.
- **Regulator** : etephon.

COCOA - COFFEE

- **Insecticides** : imidacloprid, diazinon, bifenthrin + acetamiprid.
- **Fungicides** : metalaxyl + copper oxide, copper oxide, Bordeaux mixture, dimetomorph + copper oxide.
- **Stored food treatments** : aluminium phosphide.

SUGAR CANE

- **Herbicides** : MSMA, diuron, glyphosate, 2.4.D, metribuzin, hexazinone, tebuthiuron, asulam.

RUBBER - PALM OIL

- **Herbicides** : glyphosate, glufosinate-ammonium, diuron, MSMA, 2.4 D, diuron, metsulfuron-methyl.
- **Fungicides** : sulfur, Bordeaux mixture, maneb.
- **Defoliant and plant growth stimulants** : etephon.

CORN - RICE - MILLET - SORGHUM - CEREALS

- **Herbicides** : propanil, propanil + triclopyr, oxadiazon, bensulfuron methyl, butachlor, propanil + 2.4 D, 2 4 D, nicosulfuron, alachlor, metolachlor, terbutryn, sulfosulfuron, pendimethalin...

VEGETABLE CROPS

- **Insecticides** : cypermethrin, cypermethrin + acetamiprid, profenofos, triazofos, indoxacarb, chloranpropinols, lambda-cyhalothrin, acetamiprid, chlorpyrifos ethyl, methomyl.
- **Fungicides** : maneb, mancozeb, metalaxyl, sulfur, copper.
- **Seed treatments** : imidacloprid + thiram.

FOLIAR FERTILISERS

ALM International has developed a foliar fertiliser in the form of a gel which allows for a 30 to 50% reduction of fertilisation costs and a 10 to 30% increase in yield. These foliar fertilisers are sold commercially under the names :

- **Folicao** for cocoa
- **Foliriz** for rice
- **Folimais** and **folikaba** for corn
- **Folicoton** for cotton
